

LotteryWest Barcodes

LotteryWest have introduced price-embedded barcodes on all lotto tickets. This allows for scanning directly into the PosBrowser cash register! Each individual ticket will have a barcode on it, as well as a “summary” ticket that will include the total for all sales for the session, including payouts. Follow the steps below to set your PosBrowser system up and ready for this new feature:

Turn on the Scales Feature and Set the Pay-out Codes

- Go to System Maintenance
- Go to System Setup Values
- Click Edit
- On the Register tab scroll down to the Operational Options sub-heading
- Change the “Enable Scales Barcode usage feature” option to YES
- *Set the Lotto Scanned payout ScalesID (1) value to 00100 (see below)*
- *Set the Lotto Scanned payout ScalesID (2) value to 00090 (see below)*
- *Set the Lotto Scanned payout ScalesID (3) value to 00130 (see below)*
- *Set the Lotto Scanned payout ScalesID (4) value to 00110 (see below)*
- Click Save

Enable recording of product sales to specified registers	Dissection	[UnSpecified]	Local
Enable Scales barcode usage feature	Yes		Local
Enable Scales barcode Pre-paid features (select pay type)	[UnSpecified]		Local
Extra receipt printer message			Local
Hide Purchases With/Without GST message on receipt	No		Local
Lotto scanned payout ScalesID (1)	00100		Local
Lotto scanned payout ScalesID (2)	00090		Local
Lotto scanned payout ScalesID (3)	00130		Local
Lotto scanned payout ScalesID (4)	00110		Local
Lotto scanned payout ScalesID (5)			Local
Lotto scanned payout ScalesID (6)			Local
Merge lines (sum quantities) for same products being sold	No		Local

Check / Create Families & Classes

Because we are adding stock items for each type of ticket, we need to make sure the correct Families & Classes exist for your Lotto dissection:

- Go to Main Menu
- Go to System Maintenance
- Go to Dissection Maintenance
- Go to the Family, Class tab
- Find and click on your Lotto Sales dissection; this will then show any Families that exist.
 - If a Lotto Sales family exists, click on it in the Family section, and this will show any Classes that exist
 - If a Lotto Sales class exists, there is nothing you need to do
 - Repeat this process for your Instant Sales, Lotto Payout and Instant Payout dissections
 - If any of these dissections do not have a suitable Family & Class, follow the below steps to add them:
- With the Dissection highlighted on the left (e.g. Lotto Sales), select the “Add a New Family/Class” bullet option, then click the NEW button at the bottom
- Enter a code and description for both the family and class (e.g. “LS” & “Lotto Sales”)
- Click SAVE

Check / Create LotteryWest Creditor

We now need to check, or create a creditor for LotteryWest:

- Go to Main Menu
- Go to Creditors (Suppliers)
- Go to Maintenance
- In the "Creditor Code" field, enter a few letters to search for LotteryWest (e.g. Lot) and press enter
 - Select the LotteryWest creditor if one is found.
 - If a LotteryWest creditor is not found, click the NEW button at the bottom
- Enter a code and Company name for the new creditor
- Click on the Purchasing tab, then click EDIT (if you are creating a new creditor, edit will already have been selected)
- Set the Dissection, Family and Class to the ones you setup in Dissection Maintenance.
 - **Note:** New stock received in the future will default to this Dissection, Family and Class
- You might want to set other options here, such as default labels to No
- Click SAVE

Importing the LotteryWest Stock File

To import all of the LotteryWest products, you will need to download the file from

here: <http://possolutions.com.au/path-to-csv-file>

Once you have the file;

- Go to Main Menu
- Go to Stock Systems
- Go to Stock Import
- Double Click on the The Lott file format
- On the Import Setting Tab set the following options;
 - Creditor (Supplier)
 - Dissection
 - Family
 - Class
 - Stock Type
 - Label Type
 - Discountable
 - Default GST Category

NOTE: These options are used only for new stock and will not overwrite existing stock unless the option to update existing is selected (see below)

Stock Import

Stock File Import: The Lott (Version 1.0.0)

Import File: C:\Users\garr\OneDrive\Documents\LottoWest Import.csv [Verify File]

NOTE: Please make sure that all options on 'Import Settings' tab are set before continuing with Verification of the Import file.

Import Settings | Import Stock | Import Exceptions

Creditor: LotteryWest- LW StockType: General - O Add Stock Category

Dissection: LOTTO sales - LT LabelType: Don't Print Labels - N

Family: Lotto Sales - LS Discountable: Non-Discountable

Class: Lotto Sales - LS Default GST Category: GSTFree - F 0.0000%

Filter Save Reset

Note: Stock Import can be customised to update existing stock. There are two sections for this purpose

Update Existing Items: Ticking any of these options will updating existing stock items using the criteria set above

Lock Existing: Ticking any of these items will not allow updating of these details for existing stock items.

- Click on the Save button. (These options will now be saved for the next time this file format is used)

- Click on the  button located next to the Verify File button.
- Locate the LotteryWest barcode file that you downloaded and click on Open
- Click on the Verify File button (The system will now check the file for any errors in the file)
- Once the file has been verified go to the Import Exceptions tab and check for any import problems. If there are many exceptions then the stock import file may be corrupted – please contact the POS Solutions helpdesk for further assistance.
- Go to the Import Stock tab and check that stock details are valid. The items and details listed here are the values that will be imported into your PosBrowser stock file.
- Select Shop(s) (more than one can be selected) for Price Change and select Staff.
- Ensure the option for Immediate Price Change has been ticked
- Click Import button to start the stock file import process
- Once completed, a report will be generated detailing the items imported and changed. This report can be printed if so desired
- Each stock item will be placed in an automatically generated category that you can use in the register reports section to track the sales of the items from this import.

This category will be:

I:N:<Supplier code>:<Date>:<Shop>:<Staff> for new items and I:U: <Supplier code>:<Date>:<Shop>:<Staff> for updated items.

Tip: You can easily find the category by looking on the General Tab in Stock Maintenance on one of the imported stock items.

Separating Lotto Payouts From Sales

If you have separate dissections for your Lotto Sales and Lotto Payouts, you will need to move the Payout products into that dissection. If you combine your Lotto Sales and Lotto Payouts into one dissection, you can skip this step.

- Go to Main Menu
- Go to Stock Maintenance
- Lookup the product required (e.g. Lotto Payout) and click EDIT
- Change the Dissection, Family & Class to your Lotto Payout Dissection
- Click SAVE
- Repeat for all Payout products
 - Payout products are "Lotto Payout", "Cancel Sale", "Scratch N Win Payout" and "Lotto Player Session Negative"
- **Please Note: If you have a separate dissection, family or class for Scratch N Win Payouts, make sure to select it when modifying that stock item**
